

**CVDR RECORDED**

Registry transition committed; tombstone present at write-back.  
This CVDR is cryptographically valid and independently verifiable.

The subject below has a committed registry transition recorded in the CVDR.

A tombstone was present at write-back. This export does not claim physical byte destruction.

**REGISTRY TRANSITION**

DISCLAIMER

This PDF export is evidence of a committed registry index transition and of a tombstone present at write-back on the customer's infrastructure. It does not prove physical destruction of underlying storage bytes, and does not constitute legal advice or a warranty of regulatory compliance. Together Alone Ventures OU accepts no liability arising from reliance on this document beyond the cryptographic facts it attests.
